Extensions and Amendments in Software Version 81

Things To Know – An Overview

Innovations

- | Extension and inclusion of the anti-glare high-beam assist and diagnostic light functions for BMW 4 Series, Mercedes AMG GT and Polestar 2.

Revisions

- | Actualization of vehicle database - 205 new vehicles.
- | Revision and optimization of textual and graphic contents in the menu of the AFS selection wizard.

SEG V

Functions According to Manufacturer

This list merely gives a basic overview of the scope of our data extensions. A complete list with all the model additions for every manufacturer would be simply too extensive.

Extended and Revised Manufacturers

The following list comprises the vehicles which require a special procedure for calibration / alignment of the light distribution, such as the antiglare high beam.
